DAVID FLETCHER HOY
1863-1930

REPORT ON ENROLMENT IN INSTITUTIONS HOLDING MEMBERSHIP IN THE AMERICAN ASSOCIATION OF COLLEGIATE REGISTRARS

R. M. WEST, *Registrar, the University of Minnesota;*
Chairman, the A. A. C. R. Committee on
Educational Research

The opening of the academic year 1930-31 found the registrars of American colleges and universities again confronted with the perennial demands for information on enrolment. The predictions of August and September, and the estimates of October, which appeared reasonably satisfactory at the time, prove inadequate for November. The registrar who was more concerned with the problems of properly enrolling individual students than with counting their number, now finds it necessary to take stock of the results of his earlier activities. Only actual registration data can finally determine whether enrolment has increased, or decreased; whether the income from tuition has justified the obligations incurred for its expenditure; whether preparations for teaching and equipment have been adequate; whether special problems of caring for the necessary instruction are pending in this or that department; and whether, in fact as in prospect, "the largest enrolment in the history of the institution" has been realized.

These requests for information on enrolment come from the administration of the institution, from friends and alumni, from other schools and colleges desiring to make comparisons and find explanations for their own enrolment changes, and from the general public which considers information on enrolment "news" despite the fact that official registration figures deal with terms largely misunderstood and misinterpreted.

This demand for information has been met in a measure by such articles as appear annually in *School and Society*,

The Boston Transcript and other journals. The obvious difficulty with all such compilations lies in the fact that the basic data are not strictly comparable for different types of institutions, nor for different institutions of the same type .

In making such comparisons it is necessary to assume certain standards of measurement, which, unfortunately, do not exist; and certain uniformity in the definitions and interpretations of enrolment terms which in consideration of the differing local conditions in hundreds of institutions is purely mythical.

The Memphis Convention of the American Association of Collegiate Registrars, in April, 1930, authorized the Committee on Educational Research to assemble this report for publication in the fall number of the BULLETIN.

The questionnaire, on the results of which this report is based, was prepared by the Committee with a view of making it as simple as possible, and as applicable as possible to all member institutions. It was later modified in several particulars as a result of suggestions received from some twenty-five members of the Association, representing different types of institutions, to whom proof sheets were sent for criticism.

The committee is well aware, however, that no form of questionnaire will adequately coincide with the local situation in over seven hundred institutions. Registrars were invited, in filling out these forms to modify them to fit the peculiarities of their own institutional organization. Every effort has been made in presenting the data, to include such notes as may be necessary to a proper interpretation in each individual case. Obviously direct comparisons between institutions can be made properly only when such differences in conditions as appear in the footnotes to the tables are taken into consideration. Trends in enrolment from year to year for the same institution or for identical groups of institutions, however, have significance.

The Association of Collegiate Registrars has not as yet

been able to agree on such uniform terminology and practice in keeping enrolment statistics as would make absolute comparisons between institutions possible. It is only in a very general way in fact, that enrolment figures can be assumed to be an index of student and teaching loads.

The problem of how and where to count the part-time student, and differences in the alignment of curricula in administrative units, are the principal factors which prevent direct comparisons between institutions.

Were such comparisons possible, however, there is nothing inherent in the size of an institution which should cause concern either for the large university or the small college.

The Committee on Educational Research is not interested in the problem which usually characterizes reports of this kind, namely, that of selecting the largest, the second, third, fourth and fifth largest institutions in each of the various fields of academic interest. Obviously certain institutions as tabulated stand out as having large enrolments; others would be classified as small. A study of the trends in enrolment in institutions grouped in a general way on the basis of size conceivably might have significance. The selection of the largest Liberal Arts College, the largest Medical School, the largest School of Business Administration, however, has approximately the same value to education as the selection of a "Miss America" or an "All American" fullback.

If there is any value in a report of this kind it lies in the tendencies which changes in enrolment indicate. The reader is cautioned against drawing too comprehensive and definite conclusions from the data which follow.

The institutions holding membership in the American Association of Collegiate Registrars may be classified in a general way according to type as follows:

- a. Universities.
- b. Liberal arts colleges.
- c. Junior colleges.

- d. Teachers' colleges and normal schools.
- e. Other professional schools and technical schools.

In general the institutions reporting were assigned to the type indicated in the reply to the questionnaire. Some exceptions will be noted, particularly in those instances in which an institution might be properly interpreted as belonging in more than one group.

The enrolments in these five groups as reported for November 1, 1930, have been compared separately in Tables I to V inclusive. In each table there has been indicated the principal sources of the institution's support: F, federal funds; S, state appropriations; Prov., provincial funds; M, municipal; P, private or church funds and endowment; and T, tuition.

Even in cases where it is not so indicated it seems probable that tuition, matriculation, or incidental fees contribute in some part toward support. It was assumed, however, that the proportions of income from this source was small or negligible in cases in which "tuition" was not indicated in the reply to the questionnaire.

A further basis for classification has been made possible by indicating the policy of each institution with reference to coeducation by "M" (limited to men), "W" (limited to women) or "Co" (coeducational). In each case, also, there is shown whether or not the size of the freshman class is limited.

Following the distribution of enrolment by curricula there is given the totals as of November 1st, for both 1930 and 1929, the gain or loss in enrolment this year as compared with last, and the total enrolments for each year for men and for women separately.

It should be understood that the distribution of students to the various curricula as shown in these tables in the case of universities represent enrolments in more or less distinct college units. The corresponding distribution in the reports from other types of institutions should be interpreted as representing more frequently differences in majors within a single college curriculum.

Since the primary purpose of this report is to show tendencies in enrolment, however, it seemed proper to carry these distributions for other than the institutions actually organized as universities. It is interesting to note that in general the same tendencies with reference to gains and losses of enrolment within these fields are apparent in the several types of institutions.

Table I gives the data for the universities and for such institutions as the land grant colleges, some of which are separate from, and some included in, the state university organizations. One hundred and twenty-one reports were received from institutions in this group although several reached the committee too late for inclusion in the totals.

The total enrolment in this group for November 1, 1930, was 349,751, a gain of only 0.6 per cent over that of a year ago compared with a gain ten times as large for the year of 1929-30. An actual loss in number of women is registered with a gain in the enrolment of men students.

In the several curricula the most significant gains appear in engineering, agriculture, business administration, dentistry, forestry, mines and metallurgy, home economics and graduate work. Journalism, pharmacy, music, fine arts, and divinity show distinct loss in enrolment with slight losses in education, law, architecture, and in liberal arts.

Table II includes those institutions which offer only a general liberal arts curriculum and those offering distinct curricula in fine arts, music, journalism, home economics, and other fields but which are not organized primarily as professional or technical schools.

The proper line of demarcation may not have been drawn in every instance between the institutions listed in Table II and those in Table I. The 228 institutions in this group reported a total of 112,277 students enrolled on November 1st. This represents a loss of 1,559 students compared with the enrolment on the same date in 1929 or a decrease of 1.4 per cent. The enrolment for the year 1929-30 was 1.0 per cent greater than in 1928-29.

A comparison of the enrolment by men and women shows a condition similar to that in the universities. The registration of men was increased this year by 1.4 per cent over 1929-30 while that of women students dropped 3.2 per cent.

In Table II as in Table I losses in enrolment appear in liberal arts, fine arts, divinity, journalism and music. In this group of institutions, too, there is a loss of 6.9 per cent in enrolment in home economics. Gains are found in business administration, in education, and in graduate work. Last year losses were recorded only in music and education.

In the junior college group, Table III, there have been included only those schools definitely organized on a junior college basis. Colleges offering a full four-year course of study leading to a bachelor's degree have been classed as arts colleges, or professional schools, as the case may be, in spite of the fact that they may be given only junior college rating by the standard institutions to which they are accredited.

The forty junior colleges reporting data indicate a total enrolment of 10,837 students with a loss of 3.4 per cent as compared with November 1, 1929. The gain in enrolment last year was 7.1 per cent. Both men and women show losses in this group of institutions, 4.8 and 1.6 respectively. The losses are distributed principally to the liberal arts and home economics groups.

In Table IV will be found the data for the teachers' colleges and normal schools. These institutions represent a special type of professional school and the number with membership in the American Association warrants their consideration separately from the other professional schools and technical schools listed in Table V.

The totals for Table IV show 43,559 students, an enrolment of 3.0 per cent higher than in the fall of 1929. It is interesting to note that this increase is due to a gain of 11.6 per cent in the number of men and is in spite of a loss of 0.3 per cent in the number of women. There ap-

pears also to be significance in the fact that the enrolment in education curricula which represent over 91 per cent of this group, shows the smallest increase of any in the curricula distribution, 1.8 per cent as compared with 9.5 per cent in liberal arts; 10.4 per cent in business administration; 17.0 per cent in home economics, and 19.1 per cent in graduate work. The gain in enrolment in this group is obviously in other than the standard education curricula.

Table V includes reports from only 24 institutions. This group is the most heterogeneous of the five and includes such widely different types as medical schools, schools of mines, a textile institution and such schools of technology as might possibly be classified in the university group. The total number of students reported is 19,526, a gain of 5.4 per cent over last year with gains of 6.8 and 1.5 per cents respectively for men and women. With the exception of architecture and liberal arts enrolments, each major field as distributed in Table V shows a gain. The most significant of these are in engineering, agriculture, education, mines and metallurgy, and graduate work.

Tables VI to X inclusive, show for each of the five institutional groups a comparison of the total enrolments for the year 1929-30 with those for 1928-29. Separate comparisons are given for the enrolment of (a) the academic year, (b) summer session, (c) evening and extension, (d) correspondence, and (e) noncollegiate units.

No attempt has been made to compare net or gross totals of enrolments representing combinations of these different types of instruction. It is doubtful, in fact, whether any such comparison of totals can be made to be of any value until some unit of student enrolment measurement can be agreed to which will be equally applicable to these different types of instruction. Pending the introduction and general adoption of such a unit of measurement the comparison of totals can not be other than grossly misleading.

It is practicable, however, to compare summer session enrolments with other summer session enrolments, and correspondence students of one institution with those of another. Greater variation appears in the types of students included under the heading of extension and evening class enrolments. Differences will also be found in the counts of sub-collegiate students among which are included regular secondary school units, teacher training laboratories, vocational schools, and short courses.

Table XI summarizes the enrolment tendencies as indicated by the totals on Tables I to V inclusive.

The 469 institutions report a total of 236,700 students registered in liberal arts courses for November 1, 1930. This is a loss of 2.0 per cent as compared with 1929. The percentage of loss in women students is approximately two and one-half times that for men. Losses in this field appear in each of the five types of institutions with the exception of the teachers' colleges where a gain of 208 students is recorded.

In 1929-30 a gain of 0.8 per cent was recorded for students in liberal arts and small gains were apparent for each type of institution.

Enrolment in engineering totaling 48,388 students on November 1, 1930, represents a distinct gain (5.8 per cent) over last year and follows a corresponding gain of 7.6 per cent in 1929-30. The enrolment in engineering courses in the liberal arts group, the junior colleges and the teachers' colleges are too small to have significance or to materially affect the totals. In the universities and the technical schools the percentages of gain are 5.9 and 6.2 per cent respectively.

Law enrolment shows a loss of 3.6 per cent following a loss of 3.3 per cent in 1929-30. The number of women registered in law, however, is increasing.

Registration in medicine has increased 0.8 per cent this year as compared with 5.9 per cent in 1929-30 with a total of over 13,000 students reported. As was the case noted

in law, the enrolment of women in the medical profession is increasing proportionately faster than that of men.

The total enrolment in agriculture was reported as 9,879 students, a gain of 4.2 per cent in 1930-31. For the same group a gain of 7.7 per cent appeared for the year 1929-30. The number of women reported in this group is misleading as several institutions include their enrolments in home economics with agriculture. The number of women actually enrolled with majors in agriculture is so small as to be negligible.

In architecture and in fine arts, losses are recorded for both men and women. Business administration, however, which follows in Table XI shows significant gains. With a total of 46,128 students reported, there is an increase of 3.9 per cent. The number of women in this field is 12.2 per cent greater this year than last. In 1929-30 the increase in business administration was 14.8 per cent. Gains appear consistently in the totals for each of the five types of institutions.

Registration in dentistry shows a gain of 4.2 per cent, following a loss of 3.8 per cent last year. The reorganization of a number of dental schools during the past few years has contributed at least in part to these fluctuations in enrolment. It is doubtful whether they have any special significance. It is interesting to note, however, that the percentage of women in this field has increased materially, corresponding to gains in the enrolment of women in the professions of law and medicine.

Enrolment in divinity shows consistent losses both as of November 1st, this year and for the year 1929-30.

In education with a total of 87,428 enrolments there is a loss of 0.3 per cent. In 1929-30 there was a gain of 4.8 per cent. Strangely enough the university group in which as a rule the work in education is offered in a distinct administrative unit, shows a loss of 2.8 per cent and the smallest percentage of increase appears in the group of teachers' colleges and normal schools. The number of

men in education has increased 3.4 per cent while the number of women has decreased 1.6 per cent.

The total enrolment in forestry is too small to have special significance. It shows a gain of 5.9 per cent following a gain of 3.1 per cent for the year 1929-30.

Journalism enrolment is less in all three units in which it is reported, universities, arts colleges and junior colleges. The total loss is 7.7 per cent for November 1, 1930. The number of men in journalism shows a gain of 2.0 per cent, the decrease in women was 14.3 per cent.

Enrolments in music have fallen off in the universities (23.9 per cent) and in the liberal arts colleges (5.1 per cent) with small gains in the other three groups. The total loss in music students is recorded as 9.1 per cent with a slightly larger proportion of the loss appearing in the column for women students.

Pharmacy shows a total enrolment of 4,717 students, a decrease of 6.4 per cent compared with November 1, 1929. A loss of 2.4 per cent in this field was recorded a year ago. Practically all of this decrease is in men; one woman less than last year was reported enrolled in pharmacy.

Mines and metallurgy enrolment which is reported only from the universities with a gain of 9.4 per cent, and from the technical schools with a gain of 18.8 per cent shows a total registration of 1,835 students. This is a 12 per cent greater enrolment in this field than on November 1st of last year. Several of the universities and the technical schools include registrations in mining with those in engineering. It may be assumed, however, since the enrolment trends in mining and in engineering parallel each other closely, that the increases which appear for mining and metallurgy are typical and representative in spite of the fact that many of the students in this field are counted in the engineering group.

Home economics shows losses in the liberal arts and junior colleges but distinct gains in the other types of institutions. The increase of 3.4 per cent in the total this

year follows a corresponding gain of 4.9 per cent in 1929-30. With a very few exceptions, the men reported in this group are all registered in a curriculum for hotel administration at Cornell University.

Probably the most important general increase this year is to be found in the enrolment for graduate work. This shows a gain of 8.8 per cent over the enrolment a year ago with an increase of 7.4 per cent in the university group; 21.2 per cent in the liberal arts colleges, 19.1 per cent in the teachers' colleges, and 44.9 per cent in the professional and technical schools.

A number of obvious conclusions may be drawn from Table XI, which includes 535,950 students. This number is probably a little more than half of all the students of college grade enrolled in American colleges and universities this year.

The indicated gain in enrolment for the current year is approximately one-tenth that experienced in 1929-30. There is definitely a loss in enrolment of women students, but there is a tendency toward increasing numbers of women to prepare for the professions of medicine, law, dentistry, and business administration. The technical courses in engineering, mines, agriculture, and forestry show definite increases and more students than ever before are doing graduate work. Liberal arts courses on the other hand, together with the curricula in fine arts, music, journalism and divinity show distinct losses in enrolment.

Table XII gives a comparison between groups of institutions on a different basis. The per cent of the number of institutions showing (a) gains in enrolment, (b) gains of 5 per cent or more, and (c) losses of 5 per cent or more is given for various groupings both as of November 1, 1930, compared with November 1, 1929; and for the college years of 1929-30 and 1928-29.

Keeping in mind the fact that the actual numbers of students this year and last in all of these institutions combined is approximately the same, certain tendencies toward redistribution are apparent.

The publicly supported institutions show a much smaller proportion with losses of 5 per cent or more this year than do the privately supported schools. The percentages of the former group showing gains, and gains of 5 per cent or more are not materially lowered this year in comparison with last.

In the geographical distribution the institutions of the south central area are obviously most severely affected as a group by the redistribution of student enrolment in 1930-31. Over 40 per cent of the group lost five per cent or more of their enrolment and 73.5 per cent showed some loss.

While there was a smaller percentage of institutions with large gains in enrolment in the states of the north-eastern section than in any other regional group, that area shows the smallest proportion of institutions with actual losses in enrolment.

The reader will find other interesting comparisons to be drawn from the data in this table.

An explanation of the underlying causes for this year's enrolment is more difficult to demonstrate than the facts of enrolment alone. There is certain evidence, however, in the fact that the enrolment of women is decreasing while that of the men still shows some increase; that the tendency is toward the technological and professional curricula and away from the liberal arts, fine arts, music, and similar fields; that the graduates of our institutions are returning this year in larger numbers than ever before to do graduate work, and in the comparison between institutions on the basis of geographical location, and publicly supported institutions with lower tuition fees, to support the theory that the primary factor in this year's enrolment is in the peculiar economic crisis in which the country finds itself to-day.

It will be of interest to the members of the Association to know that the holder of this year's Association Fellowship has selected as a thesis, *The Effect of Unemployment*

on College Enrolment. The results of that investigation when they are available will, without doubt, throw further light on the data included in this report.

In submitting this report the committee also solicits comments and suggestions from members of the Association bearing both on the questionnaire and the form of the report for the benefit of the committee in formulating its plans for 1931-32.

Committee on Educational Research.

DAVID FLETCHER HOY, 1863-1930

From "The Cornell Alumni News," December 11, 1930

Davy Hoy is dead.

Registrar of the University since 1895, David Fletcher Hoy, '91, died early Saturday morning, December 6th, of heart disease, after a brief illness. He had been in poor health for more than a year, in part the result of injuries received in April, 1929. He was sixty-seven years old.

His death costs Cornell one who had become a part of the University's traditions. Celebrated in song, Davy Hoy was known to thousands of Cornellians. "Give my regards to Davy," the first line of the Bustonian Chorus, tells of the place he had in the life of the University and in the hearts of its sons and daughters.

Mr. Hoy came to Cornell in 1887 and remained until his death. He graduated in 1891, became assistant registrar, studied for a master's degree conferred in 1893, and became registrar in 1895.

It was his great interest in baseball that, indirectly, hastened his death.

For more than thirty years, Mr. Hoy was baseball adviser on the Athletic Council. It was his custom each spring to accompany the team on its trip to the South. He was aboard a bus carrying the players when it plunged off the road near Quantico, Va., on April 4, 1929. Mr. Hoy was cut about the head and face.

Since that time his health has declined. A few days ago he was stricken with heart trouble and complications set in that caused his death.

FIELD NAMED AFTER HIM

Mr. Hoy's interest in baseball brought him a singular honor in 1923, when the new baseball field west of Schoellkopf was dedicated and named Hoy Field. At that time *The Alumni News* said:

"The naming of the baseball field after David Fletcher Hoy, who is registrar, is a happy thought. To those of the minority who have stepped up to his desk and tried to slip something over on him, something less peaceful than a ball field seems more appropriate—a boxing arena, a bull pit, or the college abattoir. It is his instinct for the detection of crime and his frank disregard for the late Marquis of Queensberry that have won him prominent place in song and story. His renown at repartee has spread of its own weight, and the popular superstition is that Mr. Hoy hangs out in 'Morrill Numburr Three' and personally sends out bust notices."

The tradition surrounding Davy Hoy certainly created in those freshmen going into his presence for the first time a feeling of awe, but no one denies that he discharged his official duties with an impartiality that won him great respect.

He was devoted to the University in many ways. He served on the Faculty Committee on Student Affairs, the Committee on University Policy, on the calendar, on credentials, and on examinations boards. He was editor of the Ten-Year Books of 1898 and 1908 and of the catalogues of Kappa Sigma, of which he was a member, in 1904, 1906, and 1912.

HIS CAREER

Mr. Hoy was born October 6, 1863, at Bovina, N. Y., the son of John Robertson Hoy and Isabella Wilson (Miller) Hoy. Before entering Cornell he attended the district school at Bovina Center and the Delaware Literary Institute at Franklin, New York.

As an undergraduate he took the science course and was a member of the Christian Association and the Presbyterian Union.

The other societies of which he was a member include Sigma Xi, Kappa Sigma, (he had been treasurer and trustee of the Cornell chapter since 1898, and had served as president of the national society), Quill and Dagger,

and in the city, the Protective Police, of which he was a former captain, and the Town and Gown Club. He was a member of the First Presbyterian church. He was president of the Cornell Athletic Association in 1912.

On August 6, 1895, Mr. Hoy married Silence Howard of Butler College, who survives him. He also leaves one son, David Fletcher Hoy, Jr., of Glen Ellyn, Ill., '22; one grandson, David F. Hoy, 3d; two brothers, William Wilson Hoy, '95, of Santa Ana, Calif., and M. R. Hoy, of Oil City, Pa., and two sisters, Mrs. M. Hoy Davieson, and Mrs. Jennie Hoy Archibald, of Bovina.

Funeral services were held at Sage Chapel on December 7th. Dr. Martin D. Hardin, minister of the First Presbyterian church officiated. Interment was in Lake View Cemetery.

DR. FARRAND'S TRIBUTE

President Livingston Farrand, of Cornell University, said:

"It is doubtful if the death of any man connected with Cornell could leave a gap comparable to that created by the passing of Davy Hoy. For nearly forty years he has been an outstanding figure in Cornell life. What he did here will have a large and permanent place in the history of the University.

"To those who knew his warm heart and the generous sympathy that was his chief characteristic, the word that he has gone brings deepest sadness."

OUR PROFESSIONAL ANCESTRY

The following letter and article were received from Marian Blair, Registrar of Salem College, Winston-Salem, N. C.:

MR. W. S. HOFFMAN, *Registrar*
The Pennsylvania State College
State College, Pennsylvania

My dear Mr. Hoffman:

This summer when I was in England attending the summer meeting at Cambridge University, I spent some interesting hours in the Registry, peeping into old documents, and finding how an English university office is run. Mr. Harrison, Registry, was away at the time, but his clerk, Mr. William S. Baker, showed me the fascinating oil painting depicting the ancient duties of the Registry. I am indebted to Mr. Baker for much of the information contained in the article. It occurred to me that at our Association meeting we have rather prided ourselves on the fact that ours is a new and experimental profession, and that it might be of interest to look up something of the beginnings of the work.

I am enclosing a little article which I thought might be of interest for the BULLETIN. If it happens to fit in, use it, if not, don't hesitate to say so.

Cordially yours,

MARIAN H. BLAIR,
Registrar.

The Registrar's profession is not modern. In England it dates back to 1506 when at Cambridge Robert Hobbs, "bedell of arts, was this year constituted Registry of the University by grace."¹ Although Mr. Hobbs was not concerned with credits and transcripts, he was regulator of university ceremonies, which was no mean task in those days of pagentry, and he must have performed his duties well, for he held his office until he resigned in 1543. His successor, John Were, left diaries describing the cere-

¹ Cooper: *Annals of Cambridge*, Vol. 1, p. 285.

monies, but it was Matthew Stokes who made a record of the duties and responsibilities of his office. Mr. Fuller in *Worthies of Buckinghamshire* says of him, "A Register he was indeed, both by his place and painful performance therein, for he (as the Poet's fain of Janus with two faces) saw two worlds, that before and after the Reformation. In such junctures of time, so great was the confusion and embezzling of records that had not Master Stokes been the more careful, I believe that, though Cambridge would not be so oblivious as Messala Corvinus who forgot his own name, yet would she have forgotten the names of all her ancient officers. To secure whose succession to prosperity Mr. Stokes with great industry and fidelity collected a Catalogue of Chancellors, Vice Chancellors and Proctors."

Not only did Mr. Stokes preserve a list of dignitaries to be stored in the university archives, but he had an oil painting made depicting "all habits of the several degrees and offices of the University." The painting now hangs in the upper hall of the Registry, and shows the duties performed by Mr. Stokes and his successors in office, not the least of which was the testing of all weights and measures used by the merchants of the town. Although Cambridge had been a flourishing and busy center of trade long before the university came into existence, and had a Fair which was one of the most extensive marts of the Middle Ages, from the appearance of a corporation of scholars there began a series of feuds with the town. The scholars claimed exemption from authority and taxes, and, in addition, claimed the right to test all weights and measures.² One of the scenes in Mr. Stokes' picture shows the Registry balancing the scales in the market place, and beside the scales are the following instructions:

"This is the charge of the Clerke of the Market the Court for all Men's weight, measure and Vilellers and Craftsman—

"First the sise of a miller that his toll Dish be sealed, sised and excess not.

² Clarke, J. M.: *A Concoise Guide to the Town and University of Cambridge*.

"The sise of a Fisher that he sell noe fish but it be holesome for man.

"The sise of a Beer Brewer is that he accupy noe musty corne.

"The sise of a tanner that he taawn only neats and calves.

"The sise of a tallowe chandler as Tallow High or Lowe He sall sell.

"The sise of a barber He shall east no Bloud nor Haire in the street.

"The sise of a Sadler that he make good stuffs for the Kinge's people."

Besides acting as "clerke of the Market" the Registry is pictured as placing Chancellors, Vice Chancellors and Proctors in proper academic formation, and as sitting at a long table with weighty documents before him. Surely Master Matthew Stokes was a man of parts and one to be respected.

There were four Registraries at Cambridge during the sixteenth century, but in spite of the wide demands made upon them their salaries must have been small, and in 1624 we find the following appeal presented to the King:

"The Humble Petition of James Tabor, register of the university of Cambridge sheweth

"That whereas your majesty did about ten years past command the vice-chancellor and heads of colleges in you said university that all persons to be admitted to any degree there should first subscribe to the articles of supremacy literugy of the church of England . . . for the religious observation of which your majesties commands your auppicant hath always been appointed by the vice-chancellor to attend that service to his great trouble and hinderance, the profits of his place being very small [our sympathy goes out to Mr. Tabor] and having no allowance given him for any such publick service.

"That it therefore please your most sacred majesty . . . that every person hereafter admitted to any degree in the said university shall pay to the register there for his diligent and faithful keeping the book of the said subscriptions and attendance of that service."³

³ Cooper: *Annals of Cambridge*, Vol. 3, p. 163.

Apparently the "Humble Petition" was received with favor as the record shows that in consideration of "his daily attendance and labor" the Registry was authorized to charge the subscribers a fee of 6d. each. The amount was increased in 1646. In return for the fee the Registry was required "to provide and safely keep the book of subscriptions fairly bound and clasped or tyed up," to check lists of candidates for degrees, and to superintend the orderly admission of those desiring to subscribe, preventing the "great disorder at the times of subscription by unruly crowding and stewing whereby the register attending that service hath been discouraged and wronged by some unruly person."

True it is that since the days of Robert Hobbs, "bedell of arts," the Registry in spite of small "profits" and the "painful performance" of widely varying duties has been the very center of university life, and we may take just pride in our 425-year-old profession.

MARIAN H. BLAIR.

PERSONALS

The editor apologizes for an error in the last issue in which, on the outside cover and on the inside cover page, the issue is listed as Volume 5, Number 1. The issue was Number 1 of the Sixth Volume in the new series.

Mr. H. H. Armsby, Registrar of the Missouri School of Mines and Metallurgy, announces that the collection of office forms is available for inspection by any Registrar interested and that there will be little or no delay in the forwarding of the forms since the number on the waiting list is very small.

McMASTER UNIVERSITY MOVES TO HAMILTON

McMaster University, incorporated in 1887 by the legislature of Ontario, carried on work in arts and theology in Toronto from 1891 to May, 1930. During the past summer, the institution has moved, and is now located on the outskirts of Hamilton, Ontario, on a campus of some ninety acres, with a group of five buildings, and plans for other buildings to be erected as they become necessary and possible.

The formal opening took place on November 14th, 15th, and 16th. The lieutenant governor of the province declared the buildings open, and representatives were present from some sixty universities of Canada and the States, and a number of educational and learned societies.

At the special convocation held in connection with the opening exercises, honorary degrees were conferred upon President Rush Rhees, of the University of Rochester; Principal Malcolm C. Wallace, University College, University of Toronto; Edward W. Beatty, President of the Canadian Pacific Railway, and Chancellor of Queen's Uni-

versity; Reverend Frank W. Padelford, New York; General S. C. Mewburn, of Hamilton, and Dean Buchanan, of the University of British Columbia.

At an educational conference attended by graduates and others, papers were given by two prominent graduates of McMaster, namely, Professor W. W. Charters, of Ohio State University, and Professor T. R. Wilkins, of the University of Rochester.

The erection of the new buildings was made possible by two financial campaigns, one among the Baptist denomination, who control the institution, and one among the citizens of Hamilton, the latter of which made possible the erection of Hamilton Hall, the new Science building, which will enable the institution to make a considerable extension in the work offered in the department of science.

In Hamilton, the university will be able to serve the whole Niagara Peninsula, which is one of the most populous districts in Canada. The transfer from Toronto to Hamilton means that the five universities of the province are now well scattered geographically, with the University of Ottawa in Ottawa, Queen's University in Kingston, the University of Toronto, in Toronto, McMaster University in Hamilton, and the University of Western Ontario in London. McMaster is now forty-five miles nearer its closest American neighbor, the University of Buffalo.

Mr. Harold M. Tennant has been appointed Registrar and Head of the newly established publicity bureau at Willamette University, Salem, Oregon. Mr. Tennant was for ten years Registrar at Oregon State College.

Dr. K. P. R. Neville, Registrar of the University of western Ontario, in a letter to the editor, states that Dr. J. A. Nicholson has retired from the Registrarship of McGill University and has been succeeded by Mr. T. H. Matthews; Dr. W. E. McNeill has been made Vice-Principal

of Queen's University and is being succeeded by Miss Alice King, who was Deputy Registrar; Dr. James Brebner superannuated at Toronto last June and is succeeded by Mr. A. B. Fennell, M.A., who was Assistant Registrar.

James Moreland, for the past eight years Registrar and Executive Secretary of Georgetown College, Georgetown, Ky., has been appointed instructor in Journalism and Publicity Director of the University of Maine. He assumed his new duties the first of September.

Mr. Moreland was appointed Registrar of Georgetown College, August 1, 1922, succeeding Marshall Adams who resigned to assume a position with the Westinghouse Electric and Manufacturing Company as publicity man and promotion agent of the company. Mr. Moreland held this position until the first of September when he terminated his services to take up his new work at Maine.

Mr. Carl W. Helmstadter is the new registrar at the University of Omaha, succeeding Miss Elizabeth Barnes, who is attending Columbia University this winter and working for her Master's degree. Mr. Helmstadter earned his A.B. and A.M. degrees at the University of Nebraska.

Dr. Elmer Daniel Grant retired as Registrar of Earlham College on August 1st, after serving for seven years in that capacity. Dr. Grant came to Earlham from Michigan State College in 1920, and served as professor of mathematics and head of the department until 1923, since when he has divided his time between teaching and the work of Registrar.

During his term as Registrar Dr. Grant rendered exceptional service in initiating up-to-date methods and in perfecting the machinery of the office, as well as in the friendly assistance he gave to every student.

He is now devoting all his time to teaching and serving as head of the department of mathematics. His successor

as Registrar is Miss Opal Thornburg, who graduated from Earlham in 1923 and has since been serving as Secretary to the President and as Alumni Secretary.

Dr. C. F. Ross, Registrar of Alleghany College, is now serving his second term as Acting President of Alleghany College. He has held the offices of Dean of Men and Registrar and has recently resigned as Dean of Men in accepting the appointment as Acting President. There is no definite indication as to how long he will serve as Acting President but the editor is informed that Allegheny College hopes to have the successor to President Beebe in January. A letter to the editor from a Department Head states that "Dr. Ross is administering the institution with complete success, and the general morale is better than usual—he has been at Allegheny College for nearly forty years in one capacity or another and has always been a very efficient administrator as well as an excellent teacher."

Mr. Glen E. Hickman, Registrar at Midland College, Fremont, Nebraska, received his A.M. degree from the University of Nebraska this summer. His thesis was "The Status of the Registrar in the Standard Four-Year Denominational College."

NATIONAL SUPERINTENDENT'S ASSOCIATION

Last year the Registrars took a prominent part at the Atlantic City meeting of the National Superintendent's Association and were especially interested in the program of the Association dealing with subjects of personnel, guidance, and placement. President Mitchell has decided to coöperate with the Superintendent's Association this year at their meeting which will be held in Detroit on February 18th to 21st. Mr. F. O. Holt, Registrar of the University of Wisconsin, has been asked by Dr. Mitchell

to arrange a program for a sectional meeting of registrars. The program has been arranged for February 19th as follows:

"The High School Principal and the Registrar," by Superintendent R. F. Lewis, Marshfield, Wisconsin.

"The Registrar and the High School Principal," by Ira M. Smith, Registrar of the University of Michigan.

"Who Should Go to College," by Dr. H. A. Toops, Ohio State University, Columbus, Ohio.

On Saturday morning, February 21st, the ten personnel organizations, including the registrars, which will be meeting in Detroit, will have a general meeting and the registrars were asked to secure a speaker as one of those to appear at the general meeting. The speaker will be Dean J. B. Johnston, of the University of Minnesota, who has chosen as his subject, "Determination of College Fitness As an Element in Vocational Guidance."

It is planned to hold a dinner for all attending registrars some time during the meeting.

Mr. Erland Nelson, formerly Registrar of Dana College at Blair, Nebraska, was made president of the institution this summer in appreciation of the fine work which he has been doing there. He received his A.M. degree in August from the University of Nebraska. Mr. Nelson is a member of Phi Delta Kappa, National Honorary Education Fraternity.

COMMITTEES FOR 1930-1931

President Mitchell announces the appointment of the following committees:

Professional Education

E. L. Gillis, *Chairman*, University of Kentucky.

J. R. Robinson, George Peabody College.

J. A. Gannett, University of Maine.

Educational Research

- R. M. West, *Chairman*, University of Minnesota.
R. N. Dempster, Johns Hopkins University.
J. P. Mitchell, Stanford University.
K. P. R. Neville, College of Western Ontario.
F. L. Kerr, University of Arkansas.
I. M. Smith, University of Michigan.

Budget

- I. M. Smith, *Chairman*, University of Michigan.
E. J. Grant, Columbia University.
C. E. Friley, Texas A. and M. College.

Fellowship

- F. H. Hagemeyer, *Chairman*, Teachers College, Columbia, 2-yr. term.
F. L. Kerr, University of Arkansas, 1-yr. term.
Jennie M. Tabb, State Teachers College, Farmville, Virginia, 1-yr. term.
J. R. Sage, Iowa State College of A. and M., 3-yr. term.
J. A. Gannett, University of Maine, 2-yr. term.
C. E. Friley, Texas A. and M. College, 3-yr. term.

Study of Recording Discipline on Transcripts

- I. M. Smith, *Chairman*, University of Michigan.
E. L. Gillis, University of Kentucky.
H. C. Dorcas, State University of Iowa.

Mr. T. A. F. Williams, Registrar of the State Normal College at Chadron, Nebraska, died on October 3, 1930. Mr. Williams had been head of the Department of Mathematics since 1919, having received his Master of Arts degree in Mathematics from the University of Washington at Seattle, Washington, and had more recently been named Registrar. He is succeeded by Miss Sophia M. Uhlken. During Mr. Williams' term of office he rendered great service when the college changed from the semester to the quarter plan.

New Orleans University publishes a special bulletin announcing the death of the Registrar, Miss Annie J. Parker, on July 4, 1930. Miss Parker had been with New Orleans

University for a period of over thirty-five years. This institution for colored young men and women has a President, Registrar and several members of the faculty and administrative staff who are of the white race. Miss Parker was born in 1864 in Garden Plains, Illinois, and is a graduate of the Northern Illinois College having received both an A.B. and A.M. degree. Her services in the negro schools of the South will be, in the opinion of her colleagues, her best memorial. Miss Dovie Taletha Reeves is serving in the office of the Registrar pending the appointment of a successor to Miss Parker.

Miss Caroline B. Green, Registrar of Mount Holyoke College, sends clippings from a Northampton, Mass., newspaper announcing the death of Miss Jean C. Cahoon, Registrar of Smith College. Dean Marjorie Nicolson, of Smith College makes the following statement concerning her work at Smith College:

"More even than her efficiency, the clarity and lucidity of her mind made her invaluable to the college. I think I have never known a person whose mind was so clear, so alert, so accurate, so unfailing—so stored with information that her presence on any committee of this college has been absolutely invaluable.

"She lived one of the fullest, richest lives that I have ever known. She lived profoundly in her work; and it is just her having lived so profoundly in her work, we cannot help feeling, has been responsible for her death at such an early and tragic age. She was never willing to take any sort of vacation. She worked through the summer months, she remained during holidays at other times, when the rest of us were away, doing the work of many of us.

"It is she who has helped to solve the difficulties of many of the students who are here and of a whole group of students who have gone out from the college."

Miss Cahoon was born in 1888 at New York City, daughter of the late John and Sarah Melvane Cahoon, and was graduated from Smith College in 1911. She received her Master's degree at Stanford University in 1924. Miss Cahoon attended Teachers' College, Columbia University,

in 1914 and 1915 and taught in New Jersey high schools from 1915 to 1918. In 1918 she was appointed as assistant in the recorder's office at New York University and remained there until 1921 when she went to Berea College at Berea, Ky., as registrar. She was appointed registrar at Smith in 1924 and under her administration the office has developed until it had frequently been cited as a model office.

In appreciation for his long services as registrar of the University of North Carolina and for organizing the work of examining credentials, the title of dean of admissions and registrar has been conferred upon Dr. Thomas J. Wilson, Jr., by vote of the trustees' executive committee.

Dr. Wilson was president of the American Association of Collegiate Registrars in 1924-25 and presided at the sessions of the Association held at Boulder, Colorado, in 1925.

SECTIONAL MEETINGS

The Fifth Convention of the Pacific Coast Association of Collegiate Registrars was held on November 6th, 7th and 8th in Berkeley, San Jose, and Palo Alto. The following papers were presented at the various sessions of the Convention:

Admissions—Dr. D. C. Baker, Examiner, University of California.

Trends of Certification in California—Mrs. Evelyn Clement, Chief Division of Teacher Training and Certification, State Board of Education.

Training in the Semi-Professional Field—Dr. T. W. MacQuarrie, President, San Jose State Teachers' College.

The Problem of the Disqualified Student—Mr. H. M. Showman, Recorder, University of California at Los Angeles.

Activities of the American Association of Collegiate Registrars—Dr. J. P. Mitchell, Registrar, Stanford University, President of the American Association.

Program of Higher Education in Oregon—Earl M. Pallett, Registrar, University of Oregon.

Foreign Credentials—E. B. Stevens, Registrar, University of Washington.

The Convention visited the offices of the registrars and recorders of the colleges located in the cities in which the convention met, making the visits more or less of a laboratory period.

The Fifth Meeting of the Association of the Ohio Registrars and Examiners was held on November 7th and 8th at Athens, Ohio. Forty-four representatives from twenty-three different institutions were in attendance. Mr. R. H. Schmidt, Examiner at the University of Akron, was elected President for the next year. Mr. Clarence M. Eddy, Director of Admissions at Denison University, was elected Vice-President and Miss Alice L. Butler, Registrar of the Western College for Women, was elected Secretary-Treasurer. The following papers were presented:

The Strategic Position of the Registrar—Dr. Elmer Burritt Bryan, President of Ohio University.

The New Ranking System at Oberlin—Donald M. Love, Registrar of Oberlin College.

Orientation of College Freshmen at Ohio University—

John R. Johnston, Dean of Men at Ohio University.

Evaluating the Registrar—J. G. Quick, Registrar of the University of Pittsburgh.

Round table discussions on several topics of general interest to Directors of Admissions and to Recorders were held.

The Illinois Branch of the American Association of Collegiate Registrars was held at James Millikin University, Decatur, Illinois, on Friday, October 7th. Thirty-five members were present. The following papers were presented:

What Should Appear on a Transcript?—Enoch C. Dryness, Registrar of Wheaton College.

Evaluation of Credits from Unaccredited Colleges—John C. McHugh, Registrar of DePaul University.

The Use of Psychological and College Aptitude Tests—George R. Moon, Assistant Examiner at the University of Chicago.

The Registrar—His Part in Adjusting the Individual to the College—Miss Lorena M. Church, Registrar of Rockford College.

The Work of the Bureau of Research in Personality Problems at the University of Pittsburgh—Jesse H. White, President of James Millikin University.

At the 44th Annual Convention of the Association of Colleges and Secondary Schools of the Middle States and Maryland the registrars of the territory represented by the Association met with the idea of organizing a registrar's association. The following papers were presented:

A Comparison of High School Rankings with College Success—Wm. S. Hoffman, Registrar of The Pennsylvania State College.

A Report on a Uniform Grading System for Pennsylvania Colleges—Dr. C. F. Ross, Registrar of Allegheny College. *Meadville, Penna*

Evaluating the Registrar—J. G. Quick, Registrar of the University of Pittsburgh.

After the papers were presented a permanent organization was effected and the following officers were elected for the next year: President, Mr. Wm. S. Hoffman, Registrar of The Pennsylvania State College; Secretary-Treasurer, Mr. J. G. Quick, Registrar of the University of Pittsburgh.

The editor will be glad to receive announcements and personal items for inclusion in the bulletin.

- (1) Must enrol in three courses to be counted as a special student.

(2) Postgraduate students.

(3) Vocational teaching course.

(4) Includes students in veterinary medicine and cotton marketing.

(5) Tuition charged liberal arts students only.

(6) Ceramic engineering.

(7) Applied ceramic art.

(8) School of Political Science.

(9) Course in accounting.

(10) Includes students in music, art and speech.

(11) Applied sciences includes home economics, agriculture and mechanic arts.

(12) Separate college for men and women.

(13) Information not available.

(14) Includes pre-med students.

(15) Data includes the Blaker School of Elementary Education.

(16) Includes enrolment in music and art.

(17) Day session in college of liberal arts and sciences limited to men, other branches are coeducational.

(18) In some units only.

(19) Includes students in optometry, library training and unclassified.

(20) Included under liberal arts.

(21) Includes Columbia College, Barnard College, St. Stevens College, Seth Low Junior College and Teachers College.
- (22) Nonprofessional graduate enrolment.

(23) Includes students in hotel management.

(24) Veterinary medicine.

(25) Except in arts and sciences.

(26) Includes Journalism.

(27) Education.

(28) Includes under business administration.

(29) Includes enrolment in affiliated schools, Duchesne College, St. Mary's College, school of nursing of St. Joseph's Hospital and school of nursing at St. Catherine's Hospital.

(30) With certain restrictions.

(31)

new Brooklyn College.

Students only this session.
Part-time students.

to junior college classes.
e courses.
es for teachers.
students and one student in ag-

- (33) Includes chemistry, library service and physical education.
(34) Includes enrolment at Scripts and Claremont College.
(35) Includes Bible and spoken English.
(36) Science and unclassified.
(37) Women admitted to evening classes and summer school.
(38) Except in theology.
(39) Includes pre-professional students.
(40) Includes only music students not included in liberal arts.
(41) Includes expression.
(42) Includes commercial education.
(43) Includes physical education.
(44) Includes speech, rural arts and library science.

- (45) Includes special music students.
(46) Includes speech and commercial courses.
(47) Includes science course and 212 in engineering.
(48) Includes 64 students in law and 54 in medicine.
(49) Women admitted to graduate work.
(50) Hygiene and physical education.
(51) 30-day residence required for inclusion in count of enrolment.
(52) Speech.
(53) Report received too late for inclusion in totals.
(54) Natural sciences.
(55) Evening classes.

Liberal courses.
2 in forestry.
(15) Includes journalism (1), and pharmacy (2).
(16) A few men enrolled as day specials.
(17) Expression, special students, and one in fine arts.
(18) Tuition charged only to students from outside high school district.
(19) Includes forestry (1), journalism (6), pharmacy (4), nursing, and special students.
(20) Cooperative students.

(21) Special students.
(22) Includes agriculture (19), forestry (14), pharmacy (59), and auto mechanics, special music, and vocational students.
(23) Offers a four-year course in pharmacy.
(24) Physical education.
(25) Fine arts.
(26) Includes forestry (21), and journalism (1).
(27) Report received too late for inclusion in totals.

(12) Data for the year 1929-30 used for comparison.

(13) Included in engineering.

(14) General science and unclassified.

(15) Includes chemistry.

(16) Includes special students and students in biology, chemistry, and physics.

(17) Unclassed.

(18) Includes pre-professional students.

(19) Agricultural education.

(20) Includes mining engineering, geology, and metallurgy.

(21) Includes chemistry, biological sciences, secretarial work, and commercial teaching, and part-time students, who are also employees of the institution.

(22) Data not available.

(23) Medicine.

(24) Landscape architecture.

(25) Secretarial training.

(26) Includes library science, general science, social work, physical education, store service education, and public health nursing.

(27) Report received too late for inclusion in totals.

(28) Note that these totals are not the sums of the totals for men and women, but the totals of those courses for which comparable data were furnished both for November 1930 and 1929, and for the academic years 1929-30 and 1928-29.
